

# CUMULATIVE INDEX 1995

## Volume 33

---

January	VASCULAR IMAGING, pages 1-188
March	IMAGING OF ORTHOPEDIC HARDWARE, pages 189-416
May	IMAGING OF ORGAN TRANSPLANTATION, pages 417-618
July	IMAGING OF TUBERCULOSIS AND CRANIOSPINAL TUBERCULOSIS, pages 619-824
September	HELICAL (SPIRAL) COMPUTED TOMOGRAPHY, pages 825-1026
November	BREAST IMAGING, pages 1027-1308

---

Note: Page numbers of article titles are in **boldface** type.

Abdomen, helical CT of, in children. See *Helical CT*.

Abdominal aorta, CT angiography of, 60-61, 63  
helical CT of, 922-924, 927-928

Abdominal complications, of liver transplantation,  
534-537

Abdominal tuberculosis, 650, **691-705**

clinical features of, 650

gastrointestinal, 698-701

esophagus, 700

ileocecum and colon, 698-700

jejunum and ileum, 700-701

stomach and duodenum, 700

genitourinary, 647-648, 691-698

clinical features of, 647-648

fine-needle cytodiagnosis of, 698

pathogenesis and pathology of, 691

radiologic features of, 691-697

bladder, 696-697

female genital, 697

kidneys, 691-695

prostate/male genital, 697

ureters, 695-696

hepatosplenic, 701

lymphadenitis in, 702

pancreatic, 701

percutaneous aspiration biopsy of, 703

peritonitis in, 702-703

Abscesses, in liver transplantation, 534

intracranial, in neurotuberculosis, CT of, 757, 759

musculoskeletal, helical CT of, 969

of breast, differential diagnosis of, 1090

ultrasonography of, 1166

tuberculous, with AIDS, CT and MR imaging of, 811

Acute tubular necrosis, vs. rejection, in renal

transplantation, 443-444

nuclear medicine studies of, 485

Adenomas, hepatic, helical CT of, 876

microcystic pancreatic, helical CT of, 894

Adenosis, of breast, imaging of, 1069

Adrenal glands, helical CT of, 913

in children, 1011-1012

AIDS. See also *HIV infection*.

gastrointestinal tuberculosis with, 699-700

hepatosplenic tuberculosis with, 701

neurotuberculosis with, clinical features of, 806, 807

CT and MR imaging of, **805-820**

imaging patterns and patient management in,  
816-817

parenchymal involvement, 810-813

differential diagnosis, 812-813

direct signs, 810-811

indirect signs, 811-812

spinal tuberculosis, 813-816

differential diagnosis, 816

tuberculous meningitis, 807-810

differential diagnosis, 810

direct signs, 807-808

indirect signs, 808-810

epidemiology of, 805-806

pathogenesis of, 806-807

nontuberculous mycobacteria in, 728

tuberculosis with, **707-717**

clinical features of, 708

diagnosis of, 708-709

pathogenesis of, 708

radiologic features of, 709-715

relationship to HIV infection, 707-708

treatment and prognosis of, 715

vs. *Pneumocystis carinii* pneumonia, 714-715

tuberculous spondylitis with, 801

Airway tuberculosis, radiologic features of, 670-671

Airways, helical CT of, 853, 858-859

in children, 999-1000

Allografts, bone. See *Bone allografts*.

Aneurysms, abdominal aortic, helical CT of, 922-924, 927

aortic, helical CT of, 848-850

Aneurysms (*Continued*)

- intracranial, helical CT of, 984-986, 988
- neurovascular imaging of, 120-123
- peripheral arterial, vascular imaging of, 73
- Angiography, carbon dioxide. See *Carbon dioxide angiography*.
- CT. See *CT angiography*.
- digital. See *Digital subtraction angiography*.
- MR. See *MR angiography*.
- of genitourinary tuberculosis, 695
- of heart-lung and lung transplantation, 575
- of intestinal and multivisceral transplantation, 600-601, 609, 611
- of liver transplantation. See *Liver transplantation*.
- of pancreas transplantation, 593
- Angiomas, venous, neurovascular imaging of, 127-129
- Angioplasty, percutaneous transluminal, intravascular ultrasonography in, 39, 42
- Angioscopy, in vascular imaging, of pulmonary emboli, 179
- Ankle, trauma to, helical CT of, 959, 966
- Ankle replacement. See *Joint replacement*.
- Anterior compression devices, in anterior fixation, of thoracic, lumbar, and lumbosacral spine, 258-259, 261
- Anterior fixation, of cervical spine. See *Fixation techniques*.
- of thoracic, lumbar, and lumbosacral spine. See *Fixation techniques*.
- AO plates, in anterior fixation, of cervical spine, 216, 218-219
- in posterior fixation, of cervical spine, 226
- Aortic aneurysms, helical CT of, 848-850
- Aortic dissection, helical CT of, 848-850
- Aortiliac arteries, helical CT of. See *Retroperitoneum*.
- Aortoperipheral angiography, technique for, 5
- Arachnoiditis, tuberculous, with AIDS, CT and MR imaging of, 813-814
- Armstrong plates, in anterior fixation, of thoracic, lumbar, and lumbosacral spine, 258
- Arterial conduit occlusion, vascular imaging of, 78
- Arterial portography, helical CT during, 882-883
- Arterial thrombosis, in pancreas transplantation, 582-583
- Arteriovenous fistulas, vascular imaging of, 78
- Arteriovenous malformations, helical CT of, 848, 988-989
- Arthritis, of shoulder, with recurrent dislocation, total shoulder replacement for, 309-310
- psoriatic, of hand and wrist, orthopedic procedures for, 349-350
- rheumatoid, of hand and wrist, reconstructive surgery for, 347-349
- of shoulder, total shoulder replacement for, 311
- tuberculous, 686
- Arthrodesis, for hand and wrist trauma, 322-323
- of shoulder, vs. total shoulder replacement, 316
- Arthrography, helical, of shoulder, 959
- in total hip replacement, 280
- Arthroplasty, total knee. See *Total knee arthroplasty*.
- wrist, silicone rubber in, 359-360
- Arthroscopy, infections after, 404
- Artifacts, in mammography, 1035-1037
- of calcifications, 1111
- quality control in, 1050
- Aspiration biopsy, percutaneous, of abdominal tuberculosis, 703
- Atelectasis, in primary pulmonary tuberculosis, 660
- Atherectomy, intravascular ultrasonography in, 42-43
- Atherosclerosis, graft, in heart transplantation, nuclear medicine studies of, 488
- of carotid artery, neurovascular imaging of, 129-143
- Atlantoaxial fixation, of cervical spine, 221-222, 224
- Augmented breasts, historical aspects of, 1131-1132
- imaging of, 1131-1145
- comparative accuracies in, 1142-1143
- mammography in, 1135-1138
- MR imaging in, 1141-1142
- ultrasonography in, 1138-1141
- silicon and silicones in, 1132
- complications and safety of, 1133-1135
- breast cancer risk, 1134-1135
- capsular contraction, 1134
- immune and connective tissue disorders, 1134
- interference with mammography, 1135
- rupture and leakage, 1133-1134
- types of implants in, 1132-1133
- Automatic exposure control, in mammography, quality control in, 1047-1048, 1049
- Avascular necrosis, of femoral head, helical CT of, 975-976
- Bacillary peliosis hepatitis, helical CT of, 878-879
- Bacterial infections, hepatic, helical CT of, 878-879
- Barium contrast studies, of gastrointestinal tuberculosis, 698
- Beam quality assessment, in mammography, quality control in, 1047
- Bennett fracture-dislocation, orthopedic procedures for, 331
- Bile cast syndrome, in liver transplantation, 553
- Bile duct stones, helical CT of, 878
- Biliary complications, of liver transplantation, 474-475, 526, 529-530, 551-553, 556
- Biliary disease. See *Pancreatobiliary disease*.
- Biopsy, abdominal or retroperitoneal, helical CT-guided, 930
- core, of breast calcifications, 1117-1119
- of breast masses, 1092
- fine-needle aspiration, of breast masses, 1087, 1092, 1106, 1178, 1180-1181
- in preoperative evaluation, for liver transplantation, 515-517
- needle. See *Needle biopsy*.
- of breast masses, 1106
- MR imaging-guided, 1201
- percutaneous aspiration, of abdominal tuberculosis, 703
- percutaneous renal, for suspected rejection, in renal transplantation, 469
- ultrasound-guided, in renal transplantation, 456
- BI-RADS system, of mammography reporting, 1239-1244
- Bladder, imaging of, for tuberculosis, 696-697
- Bone allografts, 391-400
- bone graft incorporation in, 392
- classification of, 393-394
- complications of, 394-398
- cartilage degeneration, 398
- fractures, 394, 397
- infections, 397-398
- nonunion, 394
- resorption, 398
- donor selection and tissue removal in, 391-392
- historical aspects of, 391
- immunology of, 392-393
- tissue preservation and storage in, 392
- Bone grafts, in spinal surgery, 200, 202-203
- Bone resorption, after spinal surgery, 208

- Brain, abscesses of, in neurotuberculosis, CT of, 757, 759  
 edema of, in neurotuberculosis, 742-743  
 tuberculomas of, in neurotuberculosis, 650, 743-744  
 CT of, 756-757
- Breast cancer, risk of, augmented breasts and, 1134-1135  
 staging of, MR imaging in, 1201-1202
- Breast imaging. *See also Breast masses.*  
 appropriateness guidelines in, 1081-1084  
 development of, 1083  
 dissemination and review of, 1084  
 establishment and writing of, 1083-1084  
 historical aspects of, 1081-1082  
 selecting topics for, 1082-1083  
 communication issues in, 1231-1245  
 after mammography examination, 1235-1236  
 initial contact and activities before examination, 1232-1233  
 mammography examination, 1233-1235  
 notifying patient of results, 1236-1239  
 technical report, 1239-1244  
 computer-aided detection and diagnosis in. *See Computer-aided detection and diagnosis.*  
 conventional tomography in. *See Conventional tomography.*  
 digital mammography in. *See Digital mammography.*  
 dual-energy mammography in, 1227  
 in lumpectomy. *See Lumpectomy.*  
 mammography in. *See Mammography.*  
 MR imaging in. *See Magnetic resonance imaging.*  
 needle biopsy in. *See Needle biopsy.*  
 of augmented breasts. *See Augmented breasts.*  
 of benign and malignant disorders, 1067-1080  
 adenosis, 1069  
 calcifications, 1068  
 cysts, 1068  
 duct ectasia, 1068  
 ductal carcinoma in situ, 1072-1074  
 hyperplasia, 1069-1070  
 invasive lobular carcinoma, 1078  
 invasive mammary carcinoma, 1075-1078  
 lobular carcinoma in situ, 1074-1075  
 mixed glandular and stromal tumors, 1078-1079  
 Paget's disease of nipple, 1075  
 papillomas, 1070  
 radial scar and complex sclerosing lesions, 1071-1072  
 sclerosing adenosis, 1069  
 of calcifications. *See Calcifications.*  
 telemammography in, 1226-1227  
 ultrasonography in. *See Ultrasonography.*
- Breast masses. *See also Breast imaging.*  
 appropriate evaluation of, 1085-1108  
 biopsy in, 1106  
 complete assessment in, 1105-1106  
 for nonpalpable masses, 1093, 1096-1100  
 for palpable masses, 1100-1104  
 in patients over age 30, 1104  
 in patients under age 30, 1103-1104  
 imaging in, 1091-1092  
 investigational, 1092-1093  
 incomplete assessment in, 1105  
 description of, 1085-1086  
 differential diagnosis of, 1087-1091  
 fat-containing, 1091  
 irregular with spiculated, indistinct, obscured, or microlobulated margins, 1089-1091  
 round, oval, or slightly lobulated with well-circumscribed margins, 1087-1089  
 national database for, 1247-1257  
 basic elements of, 1250-1251  
 benefits of, 1252-1253  
 caveats and concerns in, 1253-1255  
 data needs, 1255  
 disclosure, 1253  
 patient confidentiality, 1253  
 resources, 1254  
 implementation of, 1255  
 mammography reports in, 1249-1250  
 medical audit in, 1249  
 value of, 1251-1252  
 probably benign, 1123-1130  
 evaluation and periodic surveillance of, 1125-1126  
 advantages of, 1127  
 clinical results of, 1126-1127  
 unresolved issues in, 1127-1129  
 mammographic features of, 1123-1125
- Breasts, augmented. *See Augmented breasts.*
- Bronchial dehiscence, helical CT of, in children, 1000
- Bronchial stenosis, in airway tuberculosis, 670
- Bronchiectasis, in airway tuberculosis, 670-671
- Bronchiolitis obliterans, in heart-lung and lung transplantation, 572-573
- Bronchogenic carcinoma, helical CT of, 844
- Bronchoscopy, fiberoptic, of tuberculosis, 644  
 virtual, helical CT in, 858-859
- Brooks technique, in posterior fixation, of cervical spine, 224
- Bruits, in neurovascular imaging, of carotid bifurcation, 143
- Budd-Chiari syndrome, helical CT of, 880  
 in preoperative evaluation, for liver transplantation, 504
- Bursitis, greater trochanteric, after total hip replacement, 280
- Buttress plates, in internal fracture fixation, 382
- Bypass graft monitoring, vascular imaging in, 79, 82-84
- Cables, in posterior fixation, of cervical spine, 224-226  
 of thoracic, lumbar, and lumbosacral spine, 235  
 in spinal surgery, 194-195
- Calcifications, of breast, 1109-1121  
 artifacts in, 1111  
 characterization of, 1111  
 predictive value of, 1112-1115  
 computer-aided detection and diagnosis of, 1223-1224  
 core biopsy for, 1117-1119  
 depiction of, 1111  
 differential diagnosis of, 1087  
 follow-up evaluation of, 1111-1112  
 imaging of, 1068  
 in ductal carcinoma in situ, 1115-1116  
 in lumpectomy, 1152, 1155-1156  
 specimen management in, 1116-1117  
 typically benign, 1109-1111
- Calcium pyrophosphate dihydrate deposition disease, in osteoarthritis, of hand and wrist, 345
- Calvarial tuberculosis, CT of, 759, 761
- Cancer, helical CT of, cervical, 934, 936-939  
 endometrial, 939, 941  
 ovarian, 939
- Cannulated screws, in anterior fixation, of cervical spine, 215
- Capitate fractures, orthopedic procedures for, 327-328
- Capsular contraction, in augmented breasts, 1134

- Carbon dioxide angiography, in vascular imaging, 15-29  
 behavior of intravascular carbon dioxide in, 16-18  
 historical aspects of, 16  
 limitations of, 27-28  
 principles of, 18-22  
 buoyancy, 20, 25  
 catheters, 20  
 gas delivery, 18-20  
 injection volume and rate, 20  
 uses and results of, 22-27
- Carcinoma, helical CT of, hepatocellular, 869-870  
 pancreatic, 890-894  
 renal cell, 911
- Carotico-basilar anastomoses, neurovascular imaging of, 116
- Carotid arteries, CT angiography of, 58-59
- Carotid bifurcation, neurovascular imaging of. See *Neurovascular imaging.*
- Carotid stenosis, helical CT of, 982-984
- Carpal dislocations, orthopedic procedures for, 329
- Carpal fractures, orthopedic procedures for, 327-329
- Carpectomy, proximal row, for osteoarthritis, of hand and wrist, 345
- Carpometacarpal joints, replacement of, 357-358
- Cartilage degeneration, after bone allografts, 398
- Caspar plates, in anterior fixation, of cervical spine, 216, 218-219
- Casts, in fracture fixation, 377
- Caval filters, placement of, intravascular ultrasonography in, 45
- Cavernous carotid aneurysms, neurovascular imaging of, 120
- Cellulitis, helical CT of, 968-969
- Central nervous system tuberculosis. See *Neurotuberculosis.*
- Cerebritis, focal tuberculous, with AIDS, CT and MR imaging of, 811
- Cervical cancer, helical CT of, 934, 936-939
- Cervical spine, helical CT of, 994
- Chemokines, in delayed hypersensitivity, in neurotuberculosis, 748, 750-751
- Chest, helical CT of, in children. See *Helical CT.*
- Chest complications, of liver transplantation, 537
- Chest wall, helical CT of, 859
- Cholangiocarcinoma, helical CT of, 870-871, 898-900
- Cholangiography, of intestinal and multivisceral transplantation, 611, 613  
 of liver transplantation, 526
- Cholecystectomy, laparoscopic, helical CT before, 900-901
- Circumscribed carcinoma, of breast, differential diagnosis of, 1088
- Cirrhosis, helical CT of, 876-877
- Clamps, in posterior fixation, of cervical spine, 226, 228
- Coagulopathy, disorders of, in liver transplantation, 534, 536
- Collecting system, in renal transplantation, ultrasonography of, 448, 451-453
- Collimation, in mammography, 1037-1038  
 quality control in, 1046
- Colloid carcinoma, of breast, imaging of, 1077-1078
- Colon, imaging of, for tuberculosis, 698-700
- Color Doppler ultrasonography, of renal transplantation. See *Renal transplantation.*
- Color flow imaging, of peripheral arterial disease. See *Peripheral arterial disease.*
- Comedo carcinoma in situ, of breast, imaging of, 1072, 1074
- Compression, in mammography, 1028-1030  
 quality control in, 1045
- Compression plates, in internal fracture fixation, 381-382
- Computed tomography, helical. See *Helical CT.*
- high-resolution, in preoperative evaluation, for heart-lung and lung transplantation, 564-565  
 of postprimary pulmonary tuberculosis, 669-670  
 in preoperative evaluation, for liver transplantation, 508, 511-512  
 to guide biopsy, 515-517  
 in vascular imaging, of pulmonary emboli, 168-173, 179  
 of airway tuberculosis, 670  
 of fracture fixation devices, 388  
 of gastrointestinal tuberculosis, 699  
 of genitourinary tuberculosis, 693-695, 697  
 of heart-lung and lung transplantation, 567-568  
 of hepatosplenic tuberculosis, 701  
 of intestinal and multivisceral transplantation, 600, 601-603  
 of neurotuberculosis. See *Neurotuberculosis.*  
 of nontuberculous mycobacteria, 727, 728  
 of pancreas transplantation, 587-589  
 of peritonitis, in abdominal tuberculosis, 702-703  
 of renal transplantation, 441-443  
 of tuberculosis, with AIDS, 711-712, 713  
 of tuberculous lymphadenitis, 702  
 of tuberculous spondylitis. See *Tuberculous spondylitis.*  
 postoperative, of spinal surgery, 209  
 of total ankle replacement, 367  
 of total knee arthroplasty, 301  
 preoperative, of total shoulder replacement, 313  
 three-dimensional spiral. See *CT angiography.*  
 vs. helical CT, of abdominal aortic aneurysms, 922-924  
 of pancreatic carcinoma, 893  
 of pulmonary parenchyma, in children, 1002
- Computer-aided detection and diagnosis, of breast masses, 1222-1226  
 detection of calcifications, 1223-1224  
 detection of mass lesions, 1224-1225  
 rationale for, 1222-1223  
 results of, 1225  
 to assess risk of future breast cancer, 1226  
 to differentiate benign from malignant lesions, 1225-1226
- Congenital heart disease, heart-lung transplantation for, 561
- Connective tissue disorders, augmented breasts and, 1134
- Contrast studies, of intestinal and multivisceral transplantation, 599, 606-607, 609
- Conventional tomography, of breast masses, limitations of, 1205-1209  
 compromise between resolution and efficiency, 1207  
 contrast and latitude, 1205-1206  
 digital vs. analog images, 1207-1209  
 inefficiency of scatter rejection, 1207  
 noise, 1206
- Core biopsy, of breast masses, 1092, 1181-1182
- Cortical plates, in internal fracture fixation, 381-382
- Corticomedullary differentiation, in MR imaging, of renal transplantation, 444
- Corticosteroids, for neurotuberculosis, 750
- Cotrel-Dubouset instrumentation, in posterior fixation, of cervical spine, 221, 228  
 of thoracic, lumbar, and lumbosacral spine, 246, 249-250

- Cranial tuberculosis. See *Neurotuberculosis*.
- Craniofacial anomalies, helical CT of, 992, 994
- Cribiform ductal carcinoma in situ, of breast, imaging of, 1073
- CT angiography, in vascular imaging, 51-70
- acquisition of, 51-57
    - contrast administration in, 52
    - image editing in, 56-57
    - image reconstruction in, 54
    - imaging volume in, 51
    - patient preparation for, 52
    - spiral acquisition, 54
    - three-dimensional rendering techniques in, 54-56
  - limitations of, 68
  - of abdominal aorta, 60-61, 63
  - of carotid arteries, 58-59
  - of iliac arteries, 63-64
  - of intracranial arteries, 57-58
  - of mesenteric arteries, 64
  - of pulmonary arteries, 59-60
  - of pulmonary emboli, 168-171, 173
  - of renal arteries, 64
  - of splanchnic venous system, 65-66
  - of thoracic aorta, 59
  - vs. MR angiography, 66, 68
- CT arterial portography, in preoperative evaluation, for liver transplantation, 511
- Cuff tear arthropathy, total shoulder replacement for, 311-312
- Cyclosporine, for immunosuppression, in organ transplantation, 420-421
- in renal transplantation, 440
  - toxicity of, 485
- Cystic duct remnant mucoceles, in liver transplantation, 552-553
- Cystic fibrosis, heart-lung transplantation for, 560-561
- Cystic neoplasms, pancreatic, helical CT of, 894-895
- Cystic tuberculosis, radiologic features of, 684
- Cysts, hepatic, helical CT of, 874-875
- of breast, differential diagnosis of, 1087
  - ultrasonography of, 1162-1164, 1165
- renal, helical CT of, 909
- Cytomegalovirus infections, in heart-lung and lung transplantation, 570, 572
- Dactylitis, tuberculous, 685-686
- Deconvolutional analysis, of vascular complications, of liver transplantation, 474-475
- Deep venous thrombosis, after total hip replacement, 280
- Degenerative disc disease, vs. tuberculous spondylitis, 799
- Degenerative spine disease, surgery for, 190
- Delayed gastric emptying, in intestinal and multivisceral transplantation, contrast studies of, 609
- Diaphragm, helical CT of, 859
- Diaphragmatic paralysis, in heart-lung and lung transplantation, plain films of, 565, 567
- Digital mammography, of breast masses, 1209-1222
- full-field area detectors in, 1212-1213, 1215
  - amorphous selenium, 1215
  - amorphous silicon, 1213, 1215
  - demagnification cameras, 1212-1213
  - digitization of film mammograms, 1212
  - direct conversion x-ray detectors, 1215
  - photostimulable phosphors, 1213
  - image display in, 1220-1222
  - image processing in, 1217-1220
  - numbers of bits of digitization in, 1210-1212
  - scanned-beam detectors in, 1215-1217

 Perfusion defects, hepatic, helical CT of, 880  
 Perfusion scans, of pulmonary emboli, 168  
 Pericardial tuberculosis, clinical features of, 650-651  
 Perinephric fluid collections, in renal transplantation, ultrasonography of, 448  
 Peripheral arterial disease, carbon dioxide angiography of, 22, 25  
   vascular imaging of, 71-90  
     aneurysms, 73  
     arterial conduit occlusion, 78  
     arteriovenous fistulas, 78  
     bypass graft monitoring, 79, 82-84  
     native disease, 85-88  
       following intervention, 88  
       preangiographic diagnosis of, 86-88  
     perivascular masses, 76, 78  
     pseudoaneurysms, 73-76  
     stenosis detection and grading, 78-79  
     technique for, 71-73  
 Peritonitis, in abdominal tuberculosis, 650, 702-703  
 Perivascular masses, vascular imaging of, 76, 78  
 Phalangeal fractures, orthopedic procedures for, 336, 339-340  
 Phantom images, in mammography, quality control in, 1043-1044  
 Phase contrast MR angiography. See *MR angiography*.  
 Photochromogens, microbiology of, 719-720  
 Phyllodes tumors, of breast, differential diagnosis of, 1088  
   imaging of, 1079  
 Pial vascular malformations, neurovascular imaging of, 124-125, 126-127  
 Pin fixators, in external fracture fixation, 384-386  
 Pins, in total hip replacement, 283  
 Plain films, in preoperative evaluation, for heart-lung and lung transplantation, 564  
   of abdominal tuberculosis. See *Abdominal tuberculosis*.  
   of fracture fixation devices, 388  
   of heart-lung and lung transplantation, 565, 567  
   of intestinal and multivisceral transplantation, 611  
   of musculoskeletal tuberculosis. See *Musculoskeletal tuberculosis*.  
   of nontuberculous mycobacteria, 724, 726-728  
   of pulmonary tuberculosis. See *Pulmonary tuberculosis*.  
   of tuberculosis, 643  
     with AIDS, 709-711, 712-714  
   postoperative, of spinal surgery, 209  
   of total knee arthroplasty. See *Total knee arthroplasty*.  
   of total shoulder replacement, 313-315  
   preoperative, of total knee arthroplasty, 290-291  
   of total shoulder replacement, 312  
 Plates, in anterior fixation, of cervical spine, 215-216, 218-220  
   of thoracic, lumbar, and lumbosacral spine, 257-258  
   in internal fixation, for hand and wrist trauma, 321  
   in internal fracture fixation, 381-382  
   in posterior fixation, of cervical spine, 226, 228  
   of thoracic, lumbar, and lumbosacral spine, 251, 255-256  
   in spinal surgery, 195-196  
   in total hip replacement, 283  
 Pleura, high-resolution CT of, in heart-lung and lung transplantation, 564  
 Pleural effusions, in postprimary pulmonary tuberculosis, 671-672  
   in primary pulmonary tuberculosis, 661-662  
 Pleural tuberculosis, clinical features of, 647

- Pneumatosis intestinalis, in intestinal and multivisceral transplantation, 609
- Pneumocystis carinii* pneumonia, vs. tuberculosis, in AIDS, 714-715
- Pneumothorax, in heart-lung and lung transplantation, CT of, 567-568
- Popliteal aneurysms, vascular imaging of, 73
- Porous coated prostheses, in total hip replacement, 281-282
- Portal vein stenosis, in liver transplantation, 547
- ultrasonography of, 526
- Portal vein thrombosis, helical CT of, 879-880
- in liver transplantation, 547
- ultrasonography of, 526
- in preoperative evaluation, for liver transplantation, 503-504
- Positron emission tomography, of breast masses, 1093
- Posterior fixation, of cervical spine. See *Fixation techniques*.
- Postpartum pelvis, helical CT of, 945, 947
- Posttransplant lymphoproliferative disorder, immunosuppression and, in heart-lung and lung transplantation, 573

 in children, 1010-1012  
 kidneys, 903-913  
   adrenal glands, 913  
   for focal lesions, 909-911  
   for renal colic, 913  
   for renal inflammatory disease, 907, 909  
   for surgical planning, 911, 913  
   for trauma, 903-904  
   in children, 1011-1012  
   protocol for, 906-907  
 Revascularization procedures, for Kienböck's  
   lunatomalacia, 350-351  
 Rheumatoid arthritis, of hand and wrist, reconstructive  
   surgery for, 347-349  
   of shoulder, total shoulder replacement for, 311  
 Ring fixators, in external fracture fixation, 386  
 Rod interconnection devices, in posterior fixation, of  
   thoracic, lumbar, and lumbosacral spine, 244  
 Rods, in internal fracture fixation, 382-383  
   in posterior fixation, of cervical spine, 228  
   of thoracic, lumbar, and lumbosacral spine. See  
     *Fixation techniques.*  
   in spinal surgery, 196, 198, 200  
 Rogers technique, in posterior fixation, of cervical spine,  
   225  
 Rolando fractures, orthopedic procedures for, 331  
 Rotator cuff tears, after total shoulder replacement, 315  
 Saccular aneurysms, neurovascular imaging of, 120  
 Saline implants, in augmented breasts, 1132-1133  
 Scaphoid fractures, orthopedic procedures for, 325-327,  
   329  
 Scapholunate advanced collapse, in osteoarthritis, of  
   hand and wrist, 345  
 Scapholunate dissociation, orthopedic procedures for,  
   329  
 Scintimammography, of breast masses, 1093  
 Scirrhous carcinoma, of breast, differential diagnosis of,  
   1089-1090  
 Sclerosing adenosis, of breast, imaging of, 1069  
 Scoliosis, surgery for, 190-191  
   complications of, 402  
 Scotochromogens, microbiology of, 720  
 Screen speed, in mammography, quality control in,  
   1048-1049  
 Screws, in anterior fixation, of cervical spine, 215, 218  
   in internal fixation, for hand and wrist trauma, 321  
   in internal fracture fixation, 378-381  
   in posterior fixation, of cervical spine, 224  
   of thoracic, lumbar, and lumbosacral spine,  
     234-235, 237-238  
   in spinal surgery, 193-194  
 Seronegative spondyloarthropathies, of hand and wrist,  
   orthopedic procedures for, 349-350  
 Short gut syndrome, intestinal and multivisceral  
   transplantation for, 596  
 Shoulder, trauma to, helical CT of, 956  
 Shoulder replacement, total. See *Total shoulder  
 replacement.*  
 Silicon implants, in augmented breasts. See *Augmented  
 breasts.*  
 Silicone implants, in augmented breasts. See *Augmented  
 breasts.*  
 Silicone rubber prostheses, for rheumatoid arthritis, of

    - skeletal. *See Musculoskeletal tuberculosis.*
    - with HIV infection, 644
  - microbiologic evaluation, 643-644
  - nonspecific effects, 642-643
  - radiologic features, 643
  - symptoms and physical findings, 643
- historical aspects of, 619-639
  - ancient times, 619-620
  - diagnosis, 622-625
  - epidemiology, 620-621
  - poetry, music, and art, 636-638
  - proof of contagion, 621-622
  - radiology, 625-627
  - treatment, 627-636
    - concoctions, gods and kings, bleeding, 627-629
    - modern chemotherapy, 633-636
    - modern surgical therapy, 631-633
    - rest and environment, 629-631
- musculoskeletal. *See Musculoskeletal tuberculosis.*
- pulmonary. *See Pulmonary tuberculosis.*
- with AIDS. *See AIDS.*
- Tuberculous spondylitis, 680-684
  - clinical and pathologic features of, 788-789
- CT and MR imaging of, 787-804
  - choice of, 790
  - CT technique, 791
  - extradural tuberculous infection, 793-801
    - CT of vertebral tuberculosis, 795-797
    - MR imaging of tuberculous spinal infection, 797-799
  - for differential diagnosis, 799, 801
  - in HIV infection, 801
  - MR imaging technique, 791-793
  - differential diagnosis of, 683-684
  - historical aspects and epidemiology of, 787-788
  - neurologic complications of, 680-681
  - radiologic features of, 681-683
- Tubular carcinoma, of breast, imaging of, 1076-1077
- Tumors, helical CT of, endobronchial, in children, 1000
  - glomus, 989
  - hepatic. *See Liver.*
  - musculoskeletal, 973, 975
  - pulmonary, 844
- Ulcerations, in neurovascular imaging, of carotid bifurcation, 143, 146
- Ulnar collateral ligament injuries, orthopedic procedures for, 329-331
- Ulnar impaction syndrome, orthopedic procedures for, 351-352
- Ultrasonography, duplex, of peripheral arterial disease. *See Peripheral arterial disease.*
  - in preoperative evaluation, for liver transplantation, 503-504, 507-508
    - to guide biopsy, 515-516
  - intravascular. *See Intravascular ultrasonography.*
  - of augmented breasts, 1138-1143
  - of breast masses, 1088, 1092, 1093, 1097-1098, 1161-1170
    - abscesses, 1166
    - cysts, 1162-1164
    - inappropriate uses of, 1167-1168
    - mass in difficult location, 1165
    - palpable mass in dense breast, 1165
    - solid masses, 1164-1165
    - technique for, 1161-1162
    - to differentiate cysts from solid masses, 1165
    - to guide interventional procedure, 1166-1167
    - to guide needle biopsy, 1172-1173, 1184
    - young patient with palpable mass, 1165-1166
  - of gastrointestinal tuberculosis, 699
  - of genitourinary tuberculosis, 695
  - of hepatosplenic tuberculosis, 701

Ultrasonography (*Continued*)

- of intestinal and multivisceral transplantation, 600, 603, 606
- of liver transplantation, 523, 526
- of pancreas transplantation, 586-587
- of pancreatic carcinoma, vs. helical CT, 893-894
- of peritonitis, in abdominal tuberculosis, 702-703
- of renal transplantation. *See Renal transplantation.*
- of tuberculous lymphadenitis, 702
- Ureters, imaging of, for tuberculosis, 695-696
- Urethra, imaging of, for tuberculosis, 697
- Urethral strictures, in pancreas transplantation, 585-586
- Urethritis, in pancreas transplantation, 585-586
- Urinary leak, percutaneous antegrade nephrostomy for, 462, 464
- Urinary obstruction, percutaneous antegrade nephrostomy for, 462, 464
- Urinary tract infections, in pancreas transplantation, 585
- Urologic complications, of pancreas transplantation, 585-586
  - of renal transplantation, nuclear medicine studies of, 481, 483-485
- Uterine leiomyomas, helical CT of, 942

- Vascular anomalies, mediastinal, helical CT of, 847-848
- Vascular calcifications, of breast, 1109-1110
- Vascular complications, of liver transplantation, 474, 530, 532, 543-545, 547, 549, 551
  - of pancreas transplantation, 582-583
  - nuclear medicine studies of, 486
  - of renal transplantation. *See Renal transplantation.*
- Vascular disease, hepatic, helical CT of. *See Liver.*
- Vascular imaging, carbon dioxide angiography in. *See Carbon dioxide angiography.*
- digital subtraction angiography in. *See Digital subtraction angiography.*
- intravascular ultrasonography in. *See Intravascular ultrasonography.*
- MR angiography in. *See MR angiography.*
- of neurovascular system. *See Neurovascular imaging.*
- of peripheral arterial disease. *See Peripheral arterial disease.*
- of pulmonary emboli. *See Pulmonary emboli.*
- three-dimensional spiral CT in. *See CT angiography.*

- Vascular interventions, digital angiography in, 12
- Vascular malformations, neurovascular imaging of, 123-126
- Venous angiomas, neurovascular imaging of, 127-129
- Venous sinus compression, neurovascular imaging of, 151
- Venous sinus thrombosis, neurovascular imaging of, 151, 162
- Venous thrombosis, in pancreas transplantation, 582-583
- Ventilation/perfusion scans, in preoperative evaluation, for heart-lung and lung transplantation, 488, 490, 564
  - of heart-lung and lung transplantation, 568, 570
  - of pulmonary emboli, 168-169, 179
- Ventriculography, radionuclide, in lung transplant candidates, 488, 490
- Vertebral tuberculosis, CT of, 795-797
- Vertebrobasilar disease, neurovascular imaging of, 149, 151
- Virtual bronchoscopy, helical CT in, 858-859
- Visceral angiography, technique for, 5, 12
- Volumetric CT. *See CT angiography.*

- Wilms' tumor, helical CT of, in children, 1012
- Wires, in internal fixation, for hand and wrist trauma, 321
  - in posterior fixation, of cervical spine, 224-226
  - of thoracic, lumbar, and lumbosacral spine, 234-235, 238
  - in spinal surgery, 194-195
- Wrist. *See Hand and wrist.*

Xenotransplantation, in organ transplantation, 430-431

Yale fusion, in posterior fixation, of cervical spine, 225

Zielke instrumentation, in anterior fixation, of thoracic, lumbar, and lumbosacral spine, 259, 261
